New products from KWC

Page 14

KWC ZOE for the kitchen

This sculptural masterpiece encapsulates all of KWC's kitchen expertise. Its distinctive features include an LED light effect, an ergonomic pull-out spray and a jetclean faceplate, which blasts off unwanted limescale deposits while the water is flowing.

Page 54

KWC ZOE for the bathroom

It was only a matter of time before KWC ZOE would win over the bathroom sector too, where its simple beauty and functionally sophisticated details bring a whole new dimension to the concept of luxury.

Page 56

KWC PIANA

For KWC PIANA, ensuring honest quality is more important than putting on a show. In many respects, this new premium product is straightforward; it offers extensive functions, ease of use and excellent value for money. With the wide range of KWC PIANA faucets available, you will be spoilt for choice – but whichever one you choose, it is sure to make working with water an enjoyable experience for you.

Dear Reader

KWC is just as versatile and efficient as our main resource – water. This is reflected in all the innovative flair we have channelled into our products over the years, making them more reliable than ever and positioning ourselves as an important player in today's premium faucet market.

Throughout this evolutionary process, one of our aims has been to enhance the KWC brand in terms of both content and visual appeal. That's why we have provided you with a refreshingly redesigned catalogue, which highlights KWC's new sense of sophistication and will make working with us and our products an even more enjoyable experience for you.

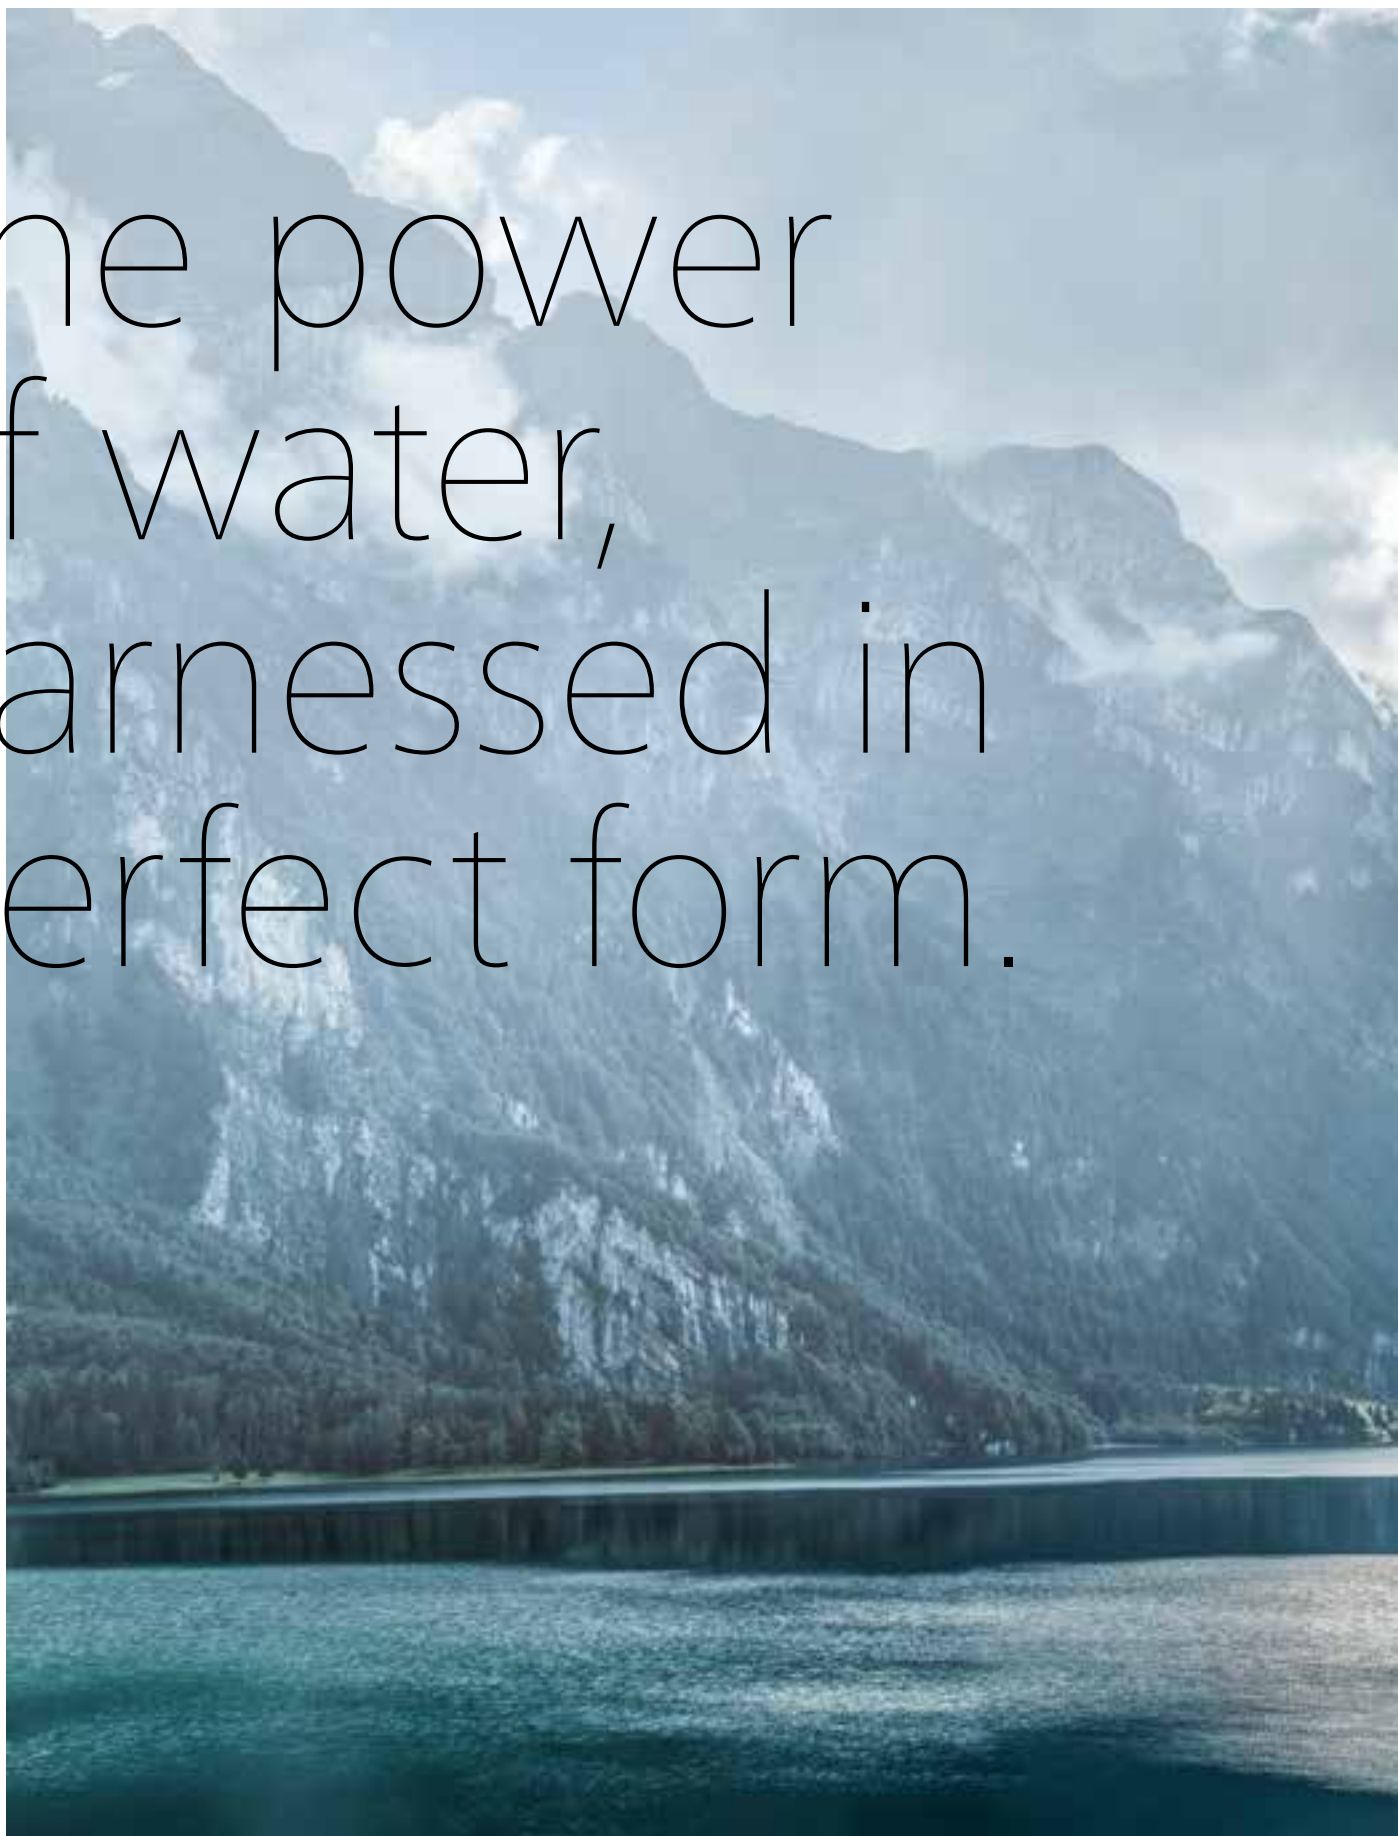

Every aspect of our top-quality faucets for bathrooms, kitchens and professional applications is designed to fulfil your requirements, so you can count on us – not only because of the experience we have established over many years, but also thanks to our 350 highly motivated employees, high-end technologies, award-winning designs and firm commitment to keeping our production based in Switzerland. After all, we want to make sure that your investment in KWC products pays off – not just now, but in the future too.

We look forward to getting to know you and hearing all about your plans.

A stylized, handwritten signature in dark ink, appearing to read 'R. Gloor', is positioned above the printed name and title.

Roland Gloor
CEO KWC

The power
of water,
harnessed in
perfect form.

As one of the world's leading brands of high-quality faucets, we turn clever new ideas in the bathroom and kitchen into a tangible reality that anyone can experience. We combine innovation, precision and aesthetics in sophisticated solutions for our customers.

Innovation

KWC faucets offer our customers extra value when it comes to comfort, care and investment security. Our solutions are developed in Switzerland and aim to fulfil the highest technological standards with intuitive and resource-friendly functions. This is because we share a long-term responsibility with our customers to use water, Earth's key resource, in a respectful way.

Precision

We respond to our customers' high expectations with precise solutions which encapsulate 140 years of experience in working with water. This promise applies both to the proven quality of our production processes and our commitment to Switzerland as a production location. It is also reflected in our well-established cooperation with employees, partners and customers, in our reliable attention to detail and in our strong service philosophy.

Aesthetics

The shape and variety of KWC's faucets symbolises the Swiss Alps and their refreshing pure water, which goes straight from the source to the consumer. Our designs have won several awards from international expert juries for their unique aesthetics and user-friendly ergonomics. The aesthetic appearance of our faucets, for example, boosts our customers' trust in the KWC brand.

Swiss Water Experience

KWC technologies

luminaqua®

A touch of a button is all it takes for this brilliant technology to transform the jet of water from the faucet into a wonderful play of light. The LEDs have a very long lifespan but use very little electricity, and the light switches off automatically after 30 to 45 minutes.

highflex®

This patented spring hose can be moved flexibly in any direction. It is also easy to clean and stays reliably in place when it is not being used.

coolfix®

coolfix® helps to save energy. When the lever is in its most frequent central position, cold water flows. Hot water is only used if the lever is turned to the left.

jetclean

This flexible faceplate reduces the amount of cleaning effort required. When water is flowing, the cone-shaped holes expand, dislodging any limescale deposits from the surface of the faceplate. The holes contract automatically when the water flow is switched off.

turn and clean

turn and clean (tac) – the name says it all: simply turn, clean and the job is done. The faceplate on kitchen sprays can be dismantled in one single movement, making it quick and easy to clean.

turn and lock

turn and lock (tal) keeps things brief: simply press, turn and it locks into place. This keeps the jet of water from the kitchen spray flowing exactly where you want it.

tipcontrol

On low-contact faucets with DDSA® sensor technology, users can set the water temperature themselves: one tap means cold (blue), two taps means warm (orange) and three means hot (red). Pressing the faucet for five seconds will activate the cleaning function (green).

colorflow

This LED display provides an accurate and continuously variable indication of the current water temperature. colorflow highlights the tip of the lever on the KWC faucet in a particularly effective way.

touchcontrol

This water guidance system with its “double skin” principle ensures that users are never scalded by their KWC faucet. The insulated hot water supply keeps the body of the faucet warm without letting it get too hot.

smartcontrol

smartcontrol keeps an eye on water consumption. Tangible resistance in the turning handle limits the amount of out-flowing water. To switch off the economy mode, twist the handle back past the catch point.

hotcontrol

Faucets with hotcontrol technology only supply water at temperatures above 38°C if the safety button on the temperature controller has been pressed deliberately. This offers users reliable protection from scalding. If the cold water supply fails, the hot water flow is automatically stopped straight away.

flexguard™

This innovative sealing membrane keeps KWC faucets watertight for a long time. It protects the control cartridge from residue left by cleaning agents and dirt. The lever support is reinforced with a metal core and integrated into the membrane, reliably preventing the lever from coming loose.

KWC control cartridges

These technological masterpieces are absolutely reliable – after all, they have been tried and tested countless times. KWC control cartridges feature a new integrated bottom seal that offers even more resistance against pressure surges. Some faucet lines only use KWC’s safety control cartridges that come with a reinforced stopper for limiting the temperature and can also withstand a very high level of strain on the lever.

Information

Color differences on stainless steel surfaces on different parts of a Franke Water Systems AG, KWC faucet made out of stainless steel, cannot totally be excluded. Different factors may lead to a slight color differentiation.

1. Already a slight difference in material composition may cause stainless steel to reflect light differently (more blue or yellow reflections). These differences in steel compositions still fulfill DIN valid material standards. They may occur within one lot of a steel production unit.
2. Different cooling or production treatment parameters may also cause color surface differentiation.
3. Different surface consistency caused by the production process may as well lead to a different light reflection, so that other colors appear.

Our aim is not to have another surface process to guarantee a 100 % stainless steel color consistency. Beside the unique KWC faucet design we would like to keep a puristic surface finish of natural stainless steel in match with our design philosophy.

By keeping production tolerances at a narrow level, we try to keep slight stainless steel surface color differentiation as little as possible. But we cannot exclude them totally. As with upper class wooden furniture, where a slight color differentiation is accepted as well on the surface, it has to be accepted that high quality faucets made by our standards may have slight color differences on their surfaces.

Operating Data

Minimal operating pressure	1 bar (15 PSI)
Ideal operating pressure	3 bar (45 PSI)
Maximal operating pressure	5 bar (70 PSI)
Equal pressures are recommended	
Maximal hotwater temperature	70°C (180°F)

Attention:

Before installation, flush pipes thoroughly!

For further information refer to our detailed sales literature.

Damages on the faucet resulting from incorrect handling are excluded from the manufacturers warranty!

General conditions

All our quotations, sales and deliveries shall be subject to the following conditions exclusively, even if the customer expressly specifies otherwise. With the acceptance of our confirmation of order or the delivery of our goods, the customer declares his acceptance of our terms and conditions. Silence on our part as regards the customer's terms and conditions shall not constitute any acknowledgement of, or consent to, the customer's terms and conditions under any circumstances. All quotations are without obligation.

Supplementary agreements and any other informal commitments need to be confirmed in writing by our Head Office in every case. None of the information contained in our catalogues is binding. This also applies to illustrations, weights, measurements and performance data. We reserve the right to alter specifications without notice.

1. Prices and sales tax

The prices and conditions which will apply are those in effect at the date of delivery. The quoted prices for our product range are EX WORKS, incl. packaging, not insured unless otherwise expressly and separately agreed. At the time valid Incoterms shall apply. All prices shall be exclusive of Value Added Tax, which is shown separately in our invoices.

In the case of inter-company deliveries, the purchaser shall give us an undertaking that the goods are being procured for his own company and are subject to the tax regulations applicable in his country. Prices are subject to change without notice.

2. Delivery and acceptance

Quoted delivery periods are approximations. If circumstances arise for which we are not responsible, e.g. a delay occasioned by delivery problems on the part of our subcontractors, the delivery period shall be extended accordingly. The delivery period shall also be appropriately extended in the event of industrial action, particularly strikes and lockouts. In the event of a resultant delay in delivery on our part, the customer shall not be entitled to any claims or cancellation of the transaction.

3. Right of the supplier to withdraw

In the event of a serious deterioration in the customer's business, particularly financial circumstances, stoppage of payments, winding-up or transfer of the business or his death or similar, or if the customer pledges stock, receivables or the purchased goods, or orders them as a security for other creditors, the supplier shall be entitled to demand security and to rescind his obligation to supply if the security is inadequate, and to demand compensation on grounds of nonfulfilment. In the event that we are prevented from manufacturing the ordered goods due to circumstances for which we are not to blame, we reserve the right to withdraw from the contract, wholly or partially, without the client being thereby entitled to make any claim whatsoever for compensation, subsequent delivery or withdrawal from the contract.

4. Packing, transport, carriage charges, small order supplement and transfer of risk

We reserve the right to choose the type of packaging used. Cardboard, paper and plastic packaging will not be taken back but must be disposed of by the receiver of the goods. Pallets, wire-mesh box pallets and other usable containers may be returned to us, carriage paid, within three months. Deliveries by post and express services will be charged at cost. If a carriage paid delivery is agreed, the supplier shall be entitled to choose the method of transport employed. For consignments to third parties, an adequate supplement of a percentage of the value of the goods will be charged.

All risks shall be transferred to the customer when the goods leave our factory/depot or are made available to the customer at our factory/depot.

5. Terms of payment

Our invoices are payable within 30 days net in Swiss Francs or Euro after receipt of invoice unless otherwise expressly and separately agreed. In the event of delays in payment, the customer shall without further reminder be liable to pay to Franke Water Systems AG, KWC default interest at a rate of 2% above the relevant discount rate of the National Bank of Switzerland. As long as older invoices remain unpaid, no entitlement to discount shall exist on the payment of new invoices. Bills of exchange shall not be accepted. If payment is made by cheque or other form of documentary remittance, the charges therefore shall be borne by the customer. If the customer is late in making a payment or his financial situation deteriorates markedly after the conclusion of the contract, all debts shall immediately become due for settlement. The customer may only offset these with uncontested or legally established counter-claims. The punctuality of payments, or otherwise, is determined by the date on which the funds are received by us.

6. Retention of title

We shall retain title to the goods supplied until all the debts due to us and incurred as a result of the business relationship have been settled in full, irrespective of the legal justification therefore. As far as such retention of title has to be recorded in public registers, the customer undertakes to issue all statements legally due for this purpose upon the supplier's first request. The customer shall be entitled to process our products or to use them with other products within the scope of his regular business operations. As a surety against our aforesaid entitlements, we shall acquire co-ownership of the objects resulting from the processing or combined use of our products, the said co-ownership being assigned to us by the customer coincidentally with the acceptance of these Conditions of Sale. The customer shall be required to keep the objects subject to our co-ownership at no charge to us. The amount of our share of co-ownership shall be determined in accordance with the value of our product relative to the value of the object resulting from its processing or combined use by the customer.

We grant our customers the right of resale in the normal course of business, subject to revocation. The said right shall be withdrawn in the event of a suspension of payments. With the acceptance of these Conditions of Sale, the customer shall assign to us all the debts and additional rights accruing to him from the resale. The assigned debts shall serve as a security for all our claims. The customer shall be entitled to collect the assigned debts, provided we have not revoked this authorisation. The authorisation to collect debts shall be withdrawn, even without any express revocation, if the customer suspends his own payments. If we so request, the customer shall inform us in writing and without delay as to whom he has resold the goods and the debts due to him as a result of the resale, and furnish us with certified documents of transfer of the debts at his expense. The customer shall not be entitled to any other provisions in respect of the objects to which we retain title or of which we hold co-ownership, or in respect of any debts assigned to us. The customer shall notify us without delay of any attachments or other legal impairments relating to objects belonging to us, either wholly or partially.

We shall be entitled at any time to call for the return of goods belonging to us if the customer falls into arrears on a payment or if his financial situation deteriorates to a marked extent. If we enforce this right, withdrawal from the contract shall only arise if we expressly declare the same, irrespective of any other mandatory official regulations. If the value of the securities assigned to us exceeds our receivables and entitlements to redemption by more than 20 %, we shall, at the customer's request, release securities to an amount to be decided by us. Samples and drawings shall remain our property, even if the customer bears the costs, or a proportion of the costs, thereof.

7. Returns

Goods may not be returned without our prior consent. Failing this, returned goods shall not be accepted. In the case of returns, we shall be entitled to levy a processing charge according to our goodwill procedure. The costs of any reconditioning required shall be invoiced separately. If goods which have been delivered carriage paid are subsequently returned by the customer, the costs of the initial delivery shall be deducted from the credit note.

8. Warranty and Liability

We guarantee the perfect, functioning of our products provided they are installed correctly and in accordance with their intended purpose. In the event of proven defects in material or workmanship we shall provide full replacement of materials. We shall not be liable for any further damage, particularly as a result of improper handling, overloading or natural wear and tear. This shall apply in particular to surface damage caused by the use of incorrectly used, abrasive or aggressive cleaning agents. Our warranty and liability in respect of materials not manufactured by us shall be restricted to the warranty and liability provided for in the conditions of sale or our subcontracted suppliers. The warranty period shall be 2 years from the date of invoice of the defective fitting. If we manufacture goods to a customer's specification, he shall be wholly responsible for ensuring that no patents or other third party rights are infringed. Any complaints concerning the weight, quantity or quality of the goods shall be notified in writing immediately after their discovery and, in any case, one week at the latest after receipt of the consignment. If the complaint proves to be justified, a replacement consignment shall be delivered free of charge and carriage paid to the original destination; in the event of quality defects, however, this shall only apply if the faulty parts are returned. Any further claims for replacements or abatement or compensation for indirect and/or direct damages shall be excluded, unless we are unable to effect a re-delivery or are guilty of gross negligence. The goods must still be in the condition in which they were delivered. For goods which have been used, the warranty terms agreed by us with suissetec (Schweizerisch-, Lichtensteinischer Gebäudetechnikverband) shall apply.

9. Place of fulfilment, court of jurisdiction, obligations imposed by contracts

The place of fulfilment for all the obligations arising from the contract is the place in which the supplier's premises are located. The court of jurisdiction for both parties is the suppliers domicile.

The contractual relationship is subject to the material laws of Switzerland. Should any provision of the contract be or become partly or entirely invalid, the validity of the remaining provisions of the contract shall not be affected. The invalid provisions are replaced by a valid rule, which attains the parties economic intent and purpose with regard to the invalid provision. The same shall apply in the event of any gaps of the contract. The Swiss original of the "Conditions of Sale and Delivery" is authoritative.
