ENAMELED CAST IRON

Skilled artisans still craft KOHLER® Enameled Cast Iron sinks, in Kohler, Wisconsin working with mostly recycled material and, in many instances, hand-applied enamel. The unique casting process results in subtle variations of texture that you can feel, making each sink just a bit different from the next – so yours is truly one of a kind. When we create something with this level of integrity and pour so much emotion into it, we know what it means to make something meaningful, something that lasts.

Strength. Style. Soul.

No other material offers the character and craftsmanship of KOHLER® Enameled Cast Iron. Each piece embodies our commitment to crafting the finest sinks for over 100 years. Built to last for generations, Kohler Enameled Cast Iron makes an enduring statement of beauty in your home with strength, style and soul.

The 6 gorgeous hues of KOHLER® Enameled Cast Iron let you bring your personality into your kitchen decor. Its rich finish and long-lasting presence make a bold statement in any room-standing beautifully on its own or highlighting other materials.

KOHLER® Enameled Cast Iron sinks can withstand whatever you and your family dish out, from heavy pasta pots to searing hot pans. Our warranty guarantees the rich enamel finish will not chip, crack or burn – so you can count on Kohler to endure in your home with strength, style and soul – for life.

INDIO®

Practicality can be beautiful. The Indio two bowl kitchen sink is contemporary with an understated sleek aesthetic, innovatively created from 93% recycled materials. Using our 'Smart Divide' design, it offers more room to fill and soak pans. Not only is it easy to use and clean, the cast iron structure is super tough. This stylish sink also includes racks and an American Walnut chopping board.

IRON/TONES®

The Iron/Tones sink offers a simple design that is equally at home in modern or traditional kitchens. The large/medium bowls allow you to keep clean and dirty dishes separate while offering plenty of room for your biggest pots and pans. A low barrier divides the two compartments, making it easy to wash and rinse large items while still keeping the two basins separate.

STAINLESS STEEL

KOHLER® Stainless Steel – Spectacular by Any Gauge

With its smooth lines and perfectly finished appearance, stainless steel is the material of choice for today's professional chef. KOHLER® stainless steel kitchen sinks make customisation easy with a wide selection of versatile designs and sink configurations.

There's no doubt about it: stainless steel is a popular choice for today's kitchens, from refrigerators and stoves to kitchen sinks, and for good reason. This classic material is not only practical, it's extremely versatile. While stainless steel sinks' neutral colour and sleek looks complement a wide range of kitchen styles, they're most at home in contemporary and transitional spaces.

Why choose KOHLER® Stainless Steel Sinks?

1. Stainless Steel Gauge

KOHLER® stainless steel sinks are made from 16- to 22-gauge type 304 and 301 stainless steel.

The stainless steel is made of a chrome and nickel alloy that assures the sinks provide exceptional resistance to stains and corrosion.

The lower the gauge, the thicker the steel. Thick steel is less likely to dent and is more sound resistant.

2. SilentShield® Technology

SilentShield sound absorption pads are applied to all KOHLER® kitchen sinks.

The pads are made of a rubber compound and significantly reduce noise from clanging dishes and from running water and disposals.

3. Durability

Stainless steel sinks live up to their name: they are incredibly resistant to staining and rust. Hot pans won't hurt them, and they're less likely than harder materials such as stone or fireclay to damage delicate dishware that may slip from your grip.

4. Hygienic

Most stainless steel sinks just need a quick wipe down with a sponge at least once a week.

STAGES™

Designed in collaboration with the chefs at Kohler's Five Diamond resort hotel, Stages meets the needs of the serious home cook. The Stages sink comes with a full array of integrated accessories to simplify the cooking and cleanup processes. The design offers a wide basin to accommodate large pots and pans, as well as a stepped side platform for prepping food or drying dishes. Handcrafted from premium quality, 16-gauge stainless steel, Stages features an engineered sound-absorption system that significantly reduces noise.

POISE®

The Poise under-mount sink offers a combination of exceptional functionality and angular design elements. Solid, 16-gauge stainless steel construction offers durability and style. Additionally, exclusive KOHLER® SilentShield sound-absorption technology sharply decreases noise and vibration from dishes, waste disposers and running water for quiet performance.

8 DEGREE™

The 8 Degree sink is handcrafted from thick, premium quality 16-gauge stainless for exceptional durability and universal style. Eight-degree angles on the front and back surfaces give you more space at the bottom of the bowl while reducing splashing. This sink includes a custom-fit wineglass rack, which allows glasses to drip dry into the basin, and a bottom basin rack to help prevent scratches.

STRIVE™

The Strive sinks are designed in multiple configurations and with intuitive features like easy-to-clean curved corners and deep basins. The Strive family of sinks is constructed of 16 gauge stainless steel, meaning a thicker and a more durable gauge. We have equipped the sinks with a variety of task-oriented accessories. All of the Strive sinks come with fitted bottom basin racks to help protect the sink from scratches and glassware from bumps. The larger sinks also include convenient accessories such as utility shelves for brushes and sponges, and a divider dishcloth bar. A hardwood cutting board is also available.

ICEROCK™ ENTERTAINMENT

The Icerock™ Entertainment sinks take functionality to a higher level in the modern day kitchen. With generous dimensions, this could be the feature design piece for your kitchen. It could also be installed as an additional second sink for maximum functionality. An engineered sound-absorption system significantly reduces disposal and dishwashing noise for a quieter kitchen environment. For further functionality, the recommended wire racks provide a flat work surface which is ideal for drainage.

GEOG®

The Geog kitchen sinks are ideal for a busy and modern kitchen environment. Geog offers an alternative take from the 1.5 bowl version and represents fantastic design. The large single bowl offers a two level base which allows for water saving for just a little washing up, whilst also being able to hold the largest of pots and pans for major tasks. The Geog range of kitchen sinks are suitable for inset, under-mount or flush-mount installation, and come complete with a basket strainer waste, a wooden chopping board and a stainless steel drainer board.

TRUE[®]

True takes linear shapes to the extreme with a pointedly angled design. Melding the sharpness of the metal and the sleek flow lines for the water; True typifies the modern uncompromising era of refinement. Certainly a look that will gild more contemporary kitchens.

HONE®

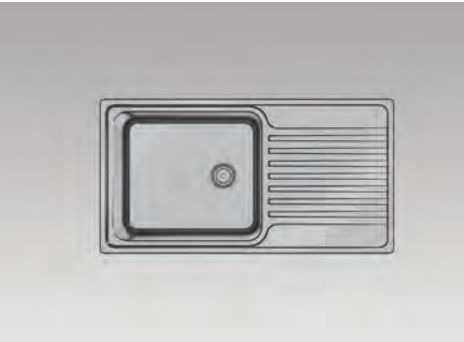

The design of Hone is a conduit between the hard work and endeavour of early 20th century industry and the refinements that adorn modern engineering. Offering sharper lines than Ease whilst still not being a fully rectilinear look; Hone redefines the ideals of comfort to offer a slightly more evocative and heavily styled solution for the home.

SENSATE™

The Sensate touchless kitchen tap is an ideal blend of beauty and brains which enables you to speed through tasks without creating a mess. The touchless feature frees your hands which therefore helps prevents mess and germs being spread throughout the kitchen when prepping, cooking and cleaning up. Response™ technology makes Sensate respond to your every move. Simply wave your hand or an object such as a pan or kitchen utensil to turn Sensate on or off. Its state-of-the-art sensor is in tune with your every move, precision-designed to provide reliable operation every time.

KARBON®

The latest in brassware technology, Karbon offers unlimited hands-free flow and flexibility – impressive from every angle. A sleek hybrid of functionality and contemporary design, the Karbon kitchen sink tap delivers water exactly where you want it. The tube design features three articulating pivot points for total range of motion: extend the tap fully to fill large pots, lower it into the sink for food preparation and cleanup, or fold it out of the way when not in use. An in-the-deck joystick valve gives you precise control of water temperature and flow.

Purist™ Pull-Down Tap (7505D-CP) Page 61

PULL-DOWN TAPS

KOHLER's pull-down taps offer an innovative fit for a variety of kitchens and tasks by combining an elegant, universal design with exceptional ergonomics and functionality. The high-arch spout rotates 360 degrees and reaches over the tallest pots, while the smoothly manoeuvring sprayhead pulls down into the sink for up-close tasks, or out of the sink to fill pots. Sculpted buttons on the sprayhead ensure simple operation even with wet, soapy hands, while Kohler's Sweep™ technology spray creates a wide and forceful blade of water for superior cleaning. Kohler's new docking system, DockNetik®, secures the pull-down sprayhead to the spout using magnetic force. Our pull-down taps also have ProMotion™ technology, which encompasses a light, quiet nylon hose and ball joint which enhances the sprayheads functionality by making it much more comfortable to use.

2-HANDLE TAPS

Elevate a classic kitchen look by choosing a KOHLER single stem, 2-handle kitchen tap. Our 2-handle taps combine beauty with the strength of stainless steel to create truly sophisticated designs. Featuring a high-arch gooseneck swing spout that makes way for your largest pots and pans, plus the added functionality of two handles to enable you to quickly find your ideal water temperature. Our ceramic disc valves exceed industry longevity standards, ensuring durable performance for life. These taps also have 360-degree spout rotation which enables superior clearance for filling pots and cleaning.

HiRise Deck-Mount Pot Filler (7323W-4-S) Page 67

POT FILLERS

Inspired by professional kitchens and cooktops, this HiRise pot filler faucet provides commercial-grade utility to home chefs. Fill your pots right where you need them, and avoid carrying heavy, filled pots across the kitchen. The deck-mount style and slim profile of this faucet leaves plenty of counter space for prep work, and the extended reach covers a wide area on your counter or stovetop. A higher-than-average flow rate quickly fills your pot with water. Offering either a deck or wall mount installation, these taps leave plenty of counter space for prep work, and the extended reach covers a wide area on your counter or cooker top.

Consider Your Options

As you design your kitchen and choose the style of your sink, there are several functionality and installation options you’ll want to consider, especially as they may impact your tap selection. We’ve outlined the basic information below. If you find you have additional questions, visit KOHLER.co.uk or contact your showroom representative.

MADE TO ORDER

MTO - Made-to-Order

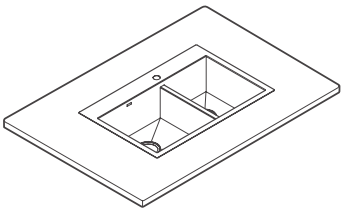

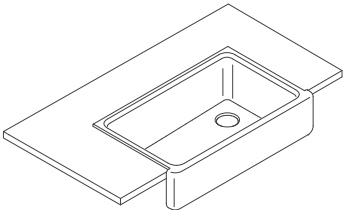

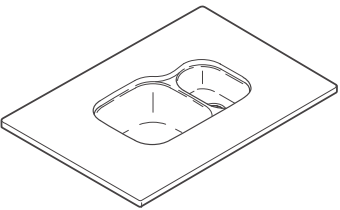

Some KOHLER® Kitchen products may be Made-to-Order. Please contact your local Retailer for details.

Bowl Count

We offer single, 1½ and double-bowl sinks to match the way you work – whether you use your dishwasher for dishes and just wash large pots in the sink or you hand wash your dishes and want to separate clean and dirty items. You’ll also find a variety of bowl sizes in our offering and may want to consider a sink with a wet work surface for food preparation i.e Stages™.

Smart Divide®

If you often wash large pots and pans yet want the functionality of a double-bowl sink, consider a Smart Divide® sink. The divider is uniquely developed to make it easier to clean large, bulky items while keeping clean and dirty items separate.

Bowl Configuration

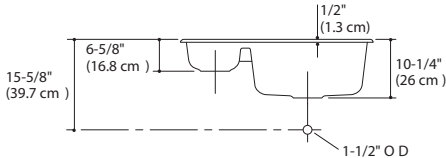

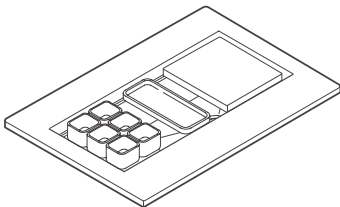

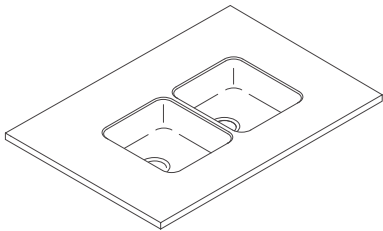

Kohler sinks are available in a range of configurations, including double-equal and 1½ bowl sinks. In addition our Icerock™ and Iron/Tones® range of sinks can be grouped to create customised configurations.

Apron-Front

Apron-front sinks are often referred to as farmhouse sinks because they can evoke period-style kitchens. These sinks have a stylish panel in front and are available as under-mount models.

Inset

The easiest model to install and frequently used with laminate work surfaces, the inset sink’s rim extends above the work top surface and supports the sink’s weight. Clips and bolts under the counter hold the sink securely in place. Many of our sinks accommodate both under-mount and inset-mount applications.

Under-Mount

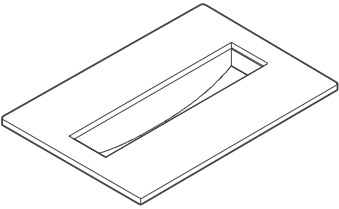

These sinks mount beneath the work top, and are most often used with solid work top materials like granite, composites and timber. Many of our sinks accommodate both under-mount and inset-mount applications.

Accessories

Many of our sinks come with custom accessories, including bottom bowl racks and cutting boards, to extend the longevity of the sink and enhance functionality. Basic accessories are available for all of our kitchen sinks. In addition, several sinks, like Stages™ and Indio®, come with accessories unique to their functionality.

Under-Mount Sink Kit

This kit helps ensure quick, sturdy installation of Kohler under-mount sinks, eliminating the need to build a wood frame or drill into the work top, saving you time, material and money.

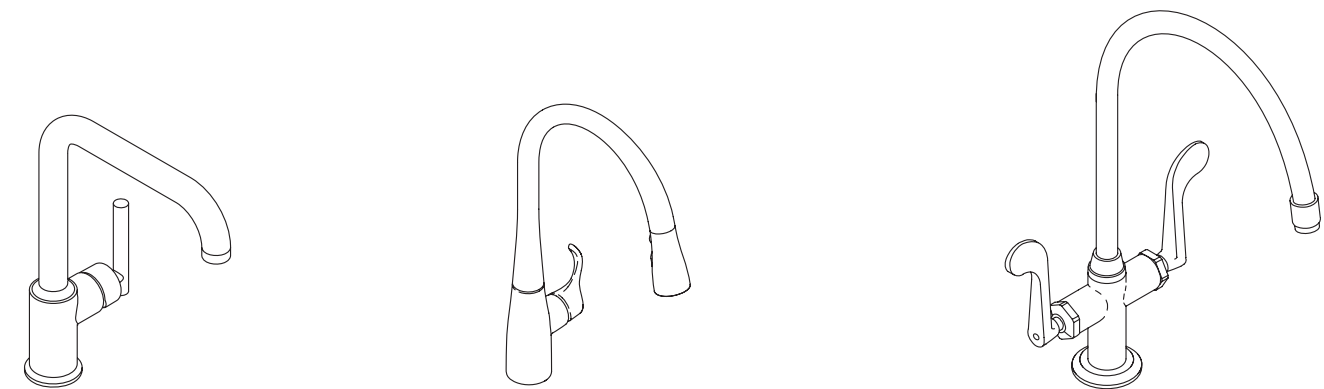

Bar and Preparation Sinks

Bar and Preparation sinks can be installed as a complement to the primary sink in the kitchen to help in food prep or cleanup or as a standalone in a family room, entertainment area or anywhere else you entertain guests.

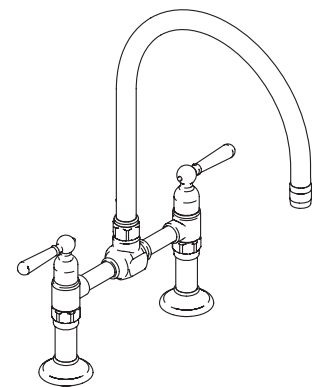

Consider Your Options

As you design your kitchen, there are several functionality and style options you'll want to consider to ensure you choose the right kitchen tap for the way you work. Below you will find a brief overview of the various different types you can choose from. If you have any additional questions, visit [KOHLER.co.uk](https://www.kohler.co.uk) or contact your showroom representative.

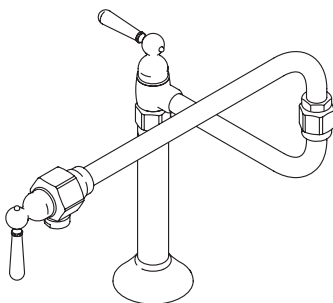

Single-Lever

The volume and temperature is controlled by one lever, located either on the tap or next to it. If you prefer the simplicity of one control, check out our single-lever models, available in both traditional and contemporary styles.

Pull-Down Spray

If you prefer a clean sink deck, a pull-down tap may be the right solution. Pull-down taps typically feature a generous spout height as well as multiple spray options – aerated, spray and pause function – for ease of use.

Two-Handle

Many people prefer the familiarity and separate temperature controls of two-handle taps. We offer a wide range of two-handle taps with a variety of handle types, including lever, cross or wristblade handles that are easy to operate.

Bridge

A fresh interpretation of a classic tap design, bridge taps can be mounted on a sink deck or wall. Bridge taps feature a two-handled design with a generous swing spout and are available in traditional or contemporary styles.

Pot Filler / Wall-Mount

Wonderfully convenient for the home cook, wall, or deck-mount pot fillers are installed next to or above a stove top, giving you quick access to water without having to transfer pots back and forth to the sink.
